White-Diamond | Lentedreef 14 | 3530 Houthalen | Belgium

QUALITY CONTROL

No	Characteristic	Specification
1	Appearance	Clear Liquid
2	PH	7
3	Viscosity	Non-Viscous
4	Flashpoint	>93°C

Product Description

Specially formulated for improved coverage and containing a higher concentration of active ingredient than other fallout removers. A product that is both; touchless, and visually tells you that it is working. The pH neutral chemistry removes excess brake dust, dirt and grime and the resulting effect is a vibrant red "bleed" when working.

Instructions for use

Red Iron is easy to use - Spray across the wheel surface and in all hard to reach places. Let the specialist anti-fallout technology work for up to 5 minutes. Watch as it changes from a colourless solution to a vibrant red as the specialist formula begins to break down contaminants. Agitate with a detailing brush on ingrained contamination. Rinse off excess product.
