White-Diamond | Lentedreef 14 | 3530 Houthalen | Belgium

QUALITY CONTROL

No	Characteristic	Specification
1	Appearance	White Liquid
2	PH	3-5
3	Viscosity	Non-Viscous
4	Flashpoint	N/A

Product Description

Nano Spray Sealant is a maintenance coating that contains 10% SiO₂.

Nano Spray Sealant lasts up to 3 months while greatly improving the gloss on vehicle surfaces. Although primarily used as a topper for SiO₂ coatings, Nano Sealant functions as a highly durable, self-contained coating.

Product benefits: A deep shine with SiO₂ protection that lasts longer than traditional waxes and sealants.

Nano Sealant protects the surfaces with a hydrophobic layer.

Instructions for use

Lightly spray Nano Spray Sealant onto the surface of your vehicle, making sure to work on only 1 panel at a time.

Usually 2-3 sprays are more than enough to cover an average sized car panel.

Distribute the product with a microfiber or microfiber applicator.

Wipe the product with a clean, dry microfibre cloth.

Do not let the car get wet for the first 2 hours.
