| 1 | Appearance | Grey Liquid |
| 2 | PH | 3-5 |
| 3 | Viscosity | 1.0-1.07 |
| 4 | Flashpoint | N/A |

Product Description

The Graphene Spray Sealant is a product based on graphene, which provides extra long protection. After application of the Graphene Spray Sealant, the paint will have an improved gloss and clarity.

Very easy to use, make sure your vehicle is clean and dry first as the more you can prepare the vehicle for application the longer it will last. But since it is a quick and easy to use product, it is not essential for good results.

Instructions for use

Lightly spray Graphene Spray Sealant onto the surface of your vehicle, making sure to work on only 1 panel at a time. Usually 2-3 sprays are more than enough to cover an average sized car panel.

Distribute the product with a microfiber or microfiber applicator.

Wait 1-3 minutes and let the product dry.

Wipe the product with a clean, dry microfibre cloth.

Do not let the car get wet for the first 2 hours.
